## **CONTEMPORARY ARCHITECTURE AND ARCHAEOLOGICAL SITES IN CALABRIA: THE STUDY CASE OF VIBO VALENTIA.**

La dArTe Summer School 2019 è la **prima edizione** di un Workshop Internazionale di Architettura promosso dal Dipartimento di Architettura e Territorio dell'Università Mediterranea di Reggio Calabria con la Facoltà di Architettura e Design della Ózyeğin University, Istanbul, Turchia; L'IPP Institut Plytechnique Panafricain, Dakar, Senegal; la SDS Struttura Didattica Speciale Architecture of Siracusa, Università di Catania; il DIDA, Dipartimento di Architettura dell'Università degli Studi di Firenze e il patrocinio della Casa della Cultura, Antiquarium e Pinacoteca "Leonida Repaci" di Palmi, del Museo Archeologico Nazionale "Vito Capialbi" di Vibo Valentia e della Soprintendenza Archeologia della Calabria.

### **TEMI DI PROGETTO DELLA SUMMER SCHOOL**

Le aree e i temi di progetto investono i siti archeologici di Hipponion e Sant'Aloe nella città di Vibo Valentia. La prima - destinata a verde pubblico e attrezzature sportive - sebbene parzialmente compromessa, richiede interventi che ne valorizzino gli aspetti panoramici e le caratteristiche di porta urbana e di accesso alle aree archeologiche greche. Al progetto, dunque, viene dato il compito sia di ridisegnare l'ingresso alla città contemporanea e sia di stabilire una relazione visiva e architettonica tra il Parco di Hipponion-Belvedere e quello di Hipponion-Trappeto, al fine di dare unitarietà al Parco Archeologico della città greca. La seconda, invece, sezionata in due parti dalla presenza di una infrastruttura carrabile strategica per la mobilità urbana, necessita di un progetto che - attraverso un ponte pedonale - garantisca la fruizione interna delle due aree del Parco Archeologico. In entrambi i casi il progetto architettonico e urbano indagherà le modalità attraverso le quali intervenire in ambiti archeologici attraverso un approccio contemporaneo.

**prezzo:** gratuito per gli studenti selezionati

**alloggio:** incluso per gli studenti di architettura selezionati provenienti dalla Ózyeğin University, IPP, SDS Architettura Siracusa-Catania; non incluso per gli studenti di architettura selezionati provenienti dal dArTe di Reggio Calabria.

**pasti:** non inclusi. Per tutta la durata del workshop, mostrando il badge che verrà consegnato ai partecipanti, sarà possibile usufruire di uno sconto concordato per cibo e bevande presso locali convenzionati.

**costi di trasporto:** non inclusi

**procedure di visto:** non incluse

**web:** <http://www.darte.unirc.it/>

Gli studenti, attraverso le revisioni con i docenti, progetteranno alcuni siti archeologici di Vibo Valentia e condurranno analisi avanzate nel campo della morfologia urbana, attraverso un approccio contemporaneo.

L'organizzazione fornirà dati cartografici e riferimenti bibliografici sull'argomento utilizzando una cartella condivisa. Tutto il materiale consegnato agli studenti non dovrà essere divulgato o pubblicato in forma cartacea o digitale e non dovrà essere pubblicato su internet o sui social media.

## **CONTEMPORARY ARCHITECTURE AND ARCHAEOLOGICAL SITES IN CALABRIA: THE STUDY CASE OF VIBO VALENTIA.**

*The dArTe Summer School 2019 - Contemporary Architecture and Archeological Sites in Calabria: The Study Case of Vibo Valentia is the first edition of an International Architecture Workshop offered by the Department of Architecture and Territory of the Mediterranean University of Reggio Calabria with the Faculty of Architecture and Design of Özyeğin University, Istanbul, Turkey; IPP Institut Polytechnique Panafricain, Dakar, Senegal; the SDS Special Educational Structure Architecture of Syracuse, University of Catania; the University of Florence - DIDA and the patronage of the House of Culture, Antiquarium and Art Gallery "Leonida Repaci" of Palmi, the National Archaeological Museum "Vito Capialbi" of Vibo Valentia and the Archaeological Superintendence of Calabria.*

### **PROJECT TOPICS OF THE SUMMER SCHOOL**

*The areas and the project topics involve the archaeological sites of Hipponion and Sant'Aloe in the city of Vibo Valentia. The first area - destined for public greenery and sports facilities - although partially compromised, requires interventions that enhance the panoramic aspects and characteristics of the urban gate and access to the Greek archaeological sites. The project, therefore, has the aim of redesigning the entrance to the contemporary city and establishing a visual and architectural relationship between the Park of Hipponion-Belvedere and that of Hipponion-Trappeto, in order to give unity to the Archaeological Park of the Greek city. The second area, on the other hand, is divided in two parts by the presence of a strategic road infrastructure for vehicular mobility, and requires a project that guarantees and improves the urban fruition of the two areas of the Park of the Roman city of Sant'Aloe. In both cases, the architectural and urban project will investigate how to intervene in archaeological areas through a contemporary approach.*

**price:** free for selected architecture students

**accommodation:** included for selected architecture students from Özyeğin University, from IPP, from SDS Architettura Siracusa-Catania; not included for selected architecture students from dArTe Reggio Calabria

**food:** not included. For the duration of the workshop, showing the badge, all the participants can benefit of an agreed discount for food and drink in selected local restaurants affiliated.

**transportation costs:** not included

**visa procedures:** not included

**web:** <http://www.darte.unirc.it/>

*Students will design, after discussing with the teaching team, some archaeological sites of Vibo Valentia, and will conduct advanced analysis in the field of urban morphology, determining the adequate way to design a contemporary transformation.*

*The organisation will provide cartographic data, maps, plans and reference to the literature on the topic, using a shared folder. All the materials given to the students should not be divulged or published in printed or in any digital form, and should not be published in internet or on social media.*
